### **DETAILED ACTION**

#### Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, drawn to a brake structure used in a wind turbine.
- II. Claims 7-12, drawn to a tower structure with yaw bearings and transformer used in a wind turbine.
  - III. Claims 13-17, drawn to a roller baring structure used in a wind turbine.
  - IV. Claims 18-21, drawn to a power transmission system for a wind turbine.
- 2. The inventions are distinct, each from the other because of the following reasons: Inventions of Group I through IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects.

  (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, functions and effects.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Mr. Dave S. Christensen on November 2, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-6. Applicant in replying to this Office action must make affirmation of this election. Claims 7-21 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

## Claim Rejections - 35 USC § 112

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:
  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 recites the limitation "said transformer" in the last line. There is insufficient antecedent basis for this limitation in the claim.

# Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brutsaert et al. (US 6,285,090) as applied to claims 1-5, and further in view of Hildingsson et al. (US 5,990,568).

Brutsaert et al. teaches a wind turbine with a nacelle, a blade rotor, a generator coupled to a shaft, a disk brake positioned radially from generator stator in recess and a housing disposed about the generator, essentially as claimed, but failed to teach a power electronics positioned within the nacelle.

Hildingsson et al. teaches a wind turbine with a nacelle and a power electronics positioned within the nacelle.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to design a wind turbine as taught by Brutsaert et al. and to position power electronics within a nacelle as taught by Hildingsson et al. in order to have a convenient and close allocation of operational and control equipment.

#### Conclusion

- 3. The prior art made of record and not relied upon is considered pertinent to applicant(s) disclosure.
- 4. When the claims are amended, applicant(s) should state in detail where in the original disclosure or in the drawings the amended features find support. **No new matter may be introduced**.
- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nicholas Ponomarenko whose telephone number is (571) 272- 2033, Fax: (571) 273-2033, or to his SPE Darren Schuberg (571) 272-2044.
- 6. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 2800 Customer Service Phone: (571) 272-2815
